NEW JERSEY
AMERICAN WATER

Valve Installation Project to Start Soon

As part of our system improvement program, New Jersey American Water is replacing a 12-inch valve On Oak Ridge Road at Raritan Road in Clark.

The project represents a critical investment for the company in support of our commitment to provide customers with high-quality, reliable water service.

Customers may experience low pressure or discolored water during this project. This is normal. If discolored water occurs, simply run the tap until the water is clear.

Project Start/End and Work Hours

Weather permitted, work will begin on or about November 2 and be completed by November 15. Generally, work hours will be from 7 a.m. to 7 p.m., however, there will be four days where we will be working around the clock. We apologize for any noise that

may be associated with this project. **NOTE: No work will be performed on election day, and all roads will be open.**

Depending on the date construction is completed, we anticipate that temporary road restoration work will be completed by the end of November. Final paving will be completed by the end of May 2017.

Traffic Impacts

For the public's and workers' safety, sections of Oak Ridge Road and Raritan Road will be closed to traffic when needed. New Jersey American Water will coordinate traffic control with Clark police.

New Jersey American Water is committed to completing the project as quickly as possible with as little inconvenience as possible.
