

# TOWNSHIP OF CLARK

## EMERGENCY COMMUNICATIONS IN TIMES OF DISASTERS

When reviewing disaster situations over the years, it has been shown that one of the most important issues is how the public receives information concerning the situation so that they can find out what is going on around them, what they can do to deal with the situation properly and safely and what the time frame is for problems to be corrected and have things get back to normal.

With that in mind the various agencies within the Township of Clark (Administration, Police Dept. and the Office of Emergency Management) now utilize a number of methods to provide this important information to the residents of Clark.

1. **Clark Township Website** In addition to the regular articles, **Emergency Information** will be posted on the Township website, [www.ourclark.com](http://www.ourclark.com) during any major event that may have an impact on our community and residents.
2. **Clark Township Email System** Residents can go onto the Township Web-site and fill in their e-mail address in the box entitled "Sign Up for Clark Twp. Email Alerts" and then follow the process to get registered to receive information on a regular and emergency basis concerning events and situations within the Township.
3. **UC First Alert System** This program was setup by Union County and Clark signed on to be a part of it several years ago. As part of the basic system all Land Line phone numbers are automatically in the system so phone calls could be made to everyone to advise them of various emergency situations. If residents wish to receive messages by other means they can go on line at [www.ucfirstalert.org](http://www.ucfirstalert.org) to register and sign up to receive a variety of items such as Emergency Messages Only, Weather Info at various time periods, or General News Messages as either text messages or emails. These messages may originate through either the County or Local Emergency Management Offices and there is no charge to the residents for these messages.
4. **NIXLE System** This system will forward emergency information to our residents by either text messages or e-mail and is also free of charge to the residents when they register. For **TEXT MESSAGES ONLY** residents can text the zip code 07066 to 888777 from any cell phone and they will be automatically registered. If residents go on line to register at [www.nixle.com](http://www.nixle.com) they would enter a valid email address with the option of entering a cell phone number also so they would then receive information via **BOTH E-MAIL AND TEXT MESSAGES**. Information through NIXLE could originate from the system in general or from the Clark PD but would only be pertinent to the Clark 07066 zip code.
5. **TV 36** The input for this station is controlled through our town and will provide important and helpful information during normal times and in time of an emergency/disaster. During several of our recent events the Mayor and other Emergency Services Personnel have gone live on TV 36 on one or more occasions to present information to our residents and then this video is replayed on a regular basis for everyone's information.

6. **LOCAL FIRE SIREN** The Township still has a fire siren in service which is utilized as follows:
- a. Tested at 12 Noon on Saturday and runs thru a **1 minute cycle** of operation
  - b. If there is a major fire in town it is run thru a **1 minute cycle** of operation as a back-up to the normal pager alerting system to alert the volunteer firemen of this emergency situation
  - c. In the event of a major town wide situation that requires the immediate notification to the public, the siren would be run thru a **3 minute cycle** as a means of alerting the residents of this emergency event and all residents should turn to TV 36, our 590 AM radio station or the town web-site for additional information.

During many of our emergency situations the town has experienced various levels of electric power outages so it is extremely important that everyone has access to a good **BATTERY POWERED RADIO** that can receive critical information from major radio stations that cover our area.

Residents should also have **BOTH A NORMAL PLUG-IN AND A MOBILE CHARGER** available so they can still charge their cellphones/smartphones/etc. even if the regular electric power does go out.
